PRODUCT PORTFOLIO

1. **Minerva** (0 to 10 | Compound LLM & AI Agents | Productivity)
   What is it: AI-driven generative solutions for text, image, audio, and video processing. It extracts entities and disambiguation from unstructured data in 20 languages, real time speech, objects and facial recognition to enhance CX and drive operational efficiency.
   Market segment: Law & Order Enforcement Agencies, B2B Enterprise Model.
   Key competitors: Palantir Artificial Intelligence Platform
   Organisation: Innefu Labs (a pre IPO, high growth startup)

2. **Argus** (1 to 100 | Digital Forensic & Financial Crime | Productivity, Analytics)
   What is it: Forensic Investigation tool that helps in identifying the hidden patterns and correlations through search, knowledge graph, media, temporal and geospatial analysis. It can ingest hundred terabytes of mobile, laptop, computer & cloud data dumps as input. It presents insights through interactive dashboards, charts, reports and network graphs.
   Market segment: Law & Order Enforcement Agencies, B2B Enterprise Model
   Key competitors: Cellebrite Pathfinder, Nuix eDescovery, Magnet AXIOM Cyber.
   Organisation: Innefu Labs (a pre IPO, high growth startup)

3. **Prophecy** (10 to 100 | Big Data Intelligence Fusion Center | Productivity)
   What is it: Prophecy provides superior intelligence processing, predictive crime analysis, and real-time actionable insights that enhance decision-making, preemptive actions, and overall operational efficiency. It analyzes intercepted electronic signals, field reports, satellite imagery, open-source data using GIS, Graph, FRS & Temporal analysis.
   Market segment: Defence and Police Forces, B2B Enterprise Model
   Key competitors: Tableau, Power BI
   Organisation: Innefu Labs (a pre IPO, high growth startup)

4. **Intelligent Automation Platform** (0 to 100 | AIoT Infrastructure | Productivity)
   What is it: Aggregate and process thousands terabyte of batch and stream data through robust, elastic & self-service multi-source connectors store, data pipelines, repositories, and, model orchestration systems, to serve multiple business applications and services.
   Market segment: Healthcare IT, B2B Enterprise Model
   Key competitors: Big Data Analytics Service vendors, Tableau, Power BI etc.

Organisation: Shaurya Technocrats (a series A, high growth startup)

5. **ePAMS** (0 to 10 | Healthcare IoT | Productivity)
   What is it: Electronic Patient Analysis & Measurement System (ePAMS) is an IoT edge computing device that integrates 15 medical sensors to capture up to 48 vitals in real time. It improved the productivity of the clinical workforce by 2X and enabled on-demand and personalised healthcare deliveries to a wider audience.
   Market segment: Primary Healthcare Service Delivery, B2B Enterprise Model
   Key competitors: YOLO Health ATMs,
   Organisation: Shaurya Technocrats (a series A, high growth startup)

6. **Connected Healthcare Platform** (0 to 10 | Healthcare | Productivity)
   What is it: A comprehensive, robust and secure Telehealth platform that aggregates virtual Doctor-Patient visits with laboratory and pharmaceutical supply chain services.
   Market segment: Primary Healthcare Delivery for Corporates & Communities, B2B
   Key competitors: Glocal Healthcare, Lybrate
   Organisation: Shaurya Technocrats (a series A, high growth startup)

7. **ARST** (stages: 0 to 1 | industry: Developer Ecosystem | space: Productivity)
   What is it: Assistance to Requirement Specification & Test-cases is an innovative devOps tool that enhances the productivity of quality assurance engineers by generating test-cases and test data to validate SWIFT based financial transactions in banks.
   Market segment: IBM's Internal DevOps teams
   Organisation: IBM India

8. **AGIS** (0 to 1, Learning & Sharing, Web & Kiosk based portal)
   What is it: Agriculture Information System through Kiosk is a Learning and Sharing platform for farmers & scientists to exchange their knowledge and experiences.
   Market segment: Agriculture Learnings, B2B Enterprise Model
   Organisation: A joint venture of IBM Learnings & Uttar Pradesh Technical University.
